European Journal of Operational Research 75 (1994) 659–660
North-Holland

Contents Volume 75

1 A review of optimisation models of Kanban-based production systems (*Invited Review*)
W. Price, M. Gravel and A.L. Nsakanda
13 Alternative optimization strategies for large-scale production-allocation problems
F.A. Lootsma
41 Solving the staircase cost facility location problem with decomposition and piecewise linearization
K. Holmberg
62 An heuristic algorithm for the production line layout problem
J.M. Gutiérrez and V. Mata
74 An analytical framework for comparing Material Requirements Planning to reorder point systems
R.L. Bregman
89 Evaluating the impact of lead time uncertainty in material requirements planning systems
C.-j. Ho and H.-S. Lau
100 Simulated annealing procedures for forming machine cells in group technology
W.-H. Chen and B. Srivastava
112 A decomposition approach for a resource constrained scheduling problem
P. Serafini and M.G. Speranza
136 On incorporating business risk into continuous review inventory models
V.R. Singhal, A.S. Raturi and J. Bryant
151 Solving a class of network models for dynamic flow control
M. Carey and A. Srinivasan
171 Traffic allocation for manufacturing systems
C.S. Tang and M. van Vliet
186 Production allocation with dual provisioning
R.H. Ahmadi and C.S. Tang
200 Expected waiting times in single-device trip-based material handling systems
Y.A. Bozer, M.-S. Cho and M.M. Srinivasan
217 A branch-and-bound approach for spare unit allocation in a series system
C.S. Sung and H.K. Lee
233 Comment on "The facility layout problem"
S. Bharitkar, K. Tsuchiya and Y. Takefuji
235 A note on the article "An improved version of Wang's algorithm for two-dimensional cutting problems" written by J.F. Oliveira and J.S. Ferreira, Volume 44, 1990, pp. 256–266.
O. Holthaus
238 A remark on "Integer linear programming formulation for a Vehicle Routing Problem" by N.R. Achutan and L. Caccetta, or how to use the Clark & Wright savings to write such integer linear programming formulations
D. Naddef

Special Issue on Lotsizing Models for Production Planning

243 Batching decisions: structure and models
R. Kuik, M. Salomon and L.N. van Wassenhove
264 Flexibility and product variety in lot-sizing models
X. de Groote
275 On practical resource allocation for production planning and scheduling with period overlapping setups
C. Dillenberger, L.F. Escudero, A. Wollensak and W. Zhang
287 Lot sizing for a product subject to obsolescence or perishability
K. Jain and E.A. Silver
296 A heuristic for dynamic multi-item multi-level capacitated lotsizing for general product structures
H. Tempelmeier and S. Helber
312 Using geometric techniques to improve dynamic programming algorithms for the economic lot-sizing problem and extensions
S. van Hoesel, A. Wagelmans and B. Moerman
332 A new heuristic approach for the multi-item dynamic lot sizing problem
Ö. Kırca and M. Kökten
342 A linear description of the discrete lot-sizing and scheduling problem
S. van Hoesel and A. Kolen

0377-2217/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

354 Feasibility of scheduling lot sizes of two frequencies on one machine
C.A. Glass
365 A job-splitting heuristic for lot-size scheduling in multi-stage, multi-product production processes
M.K. El-Najdawi
378 Lot streaming in three-stage production processes
C.A. Glass, J.N.D. Gupta and C.N. Potts
395 The discrete lot-sizing and scheduling problem with sequence-dependent setup costs
B. Fleischmann
405 *Multi-level production–inventory control:* Material requirements planning or reorder point policies?
S. Axsäter and K. Rosling
413 Integration of lotsizing and scheduling decisions in a job-shop
S. Dauzère-Péres and J.-B. Lasserre
427 An effective algorithm for the capacitated single item lot size problem
C.-S. Chung, J. Flynn and C.-H.M. Lin
441 Cyclic scheduling to minimize inventory in a batch flow line
G. Dobson and C.A. Yano
462 A simple lower bound to the dynamic assembly problem
D.R. Atkins
467 Comments on "Balancing capacity and lot sizes" by J. Olhager and B. Rapp (*European Journal of Operational Research* 19, 337–344)
K. Rosling
469 Different approaches to a flow shop problem
J. Olhager and B. Rapp

Feature Issue on Risk Management

475 Emerging Trends in Risk Management
B. Brehmer, E.A. Eriksson and P. Wulff
477 Models, modelling and modellers: an application to risk analysis
B. Wahlström
488 Overview of problems of risk management of accidents with dangerous chemicals in Europe
P. Haastrup
499 Safe transport of dangerous goods: road, rail or sea? A screening of technical and administrative factors
S.-E. Andersson
508 A real-time routing model for hazardous materials
G.E.G. Beroggi
521 A probabilistic method for analyzing the reliability effect of time and organizational factors
B. Reer
540 Psychological aspects of traffic safety
B. Brehmer
553 Costs of occupational accidents and diseases in Norway
K. Rognstad

567 Developing and validating a decision support system for locating emergency medical vehicles in Louisville, Kentucky
J.F. Repede and J.J. Bernardo
582 The relocation of ambulance stations: A successful case study
W.E. McAleer and I.A. Naqvi
589 Barter contracts in intertemporal energy exchange
J. Ruusunen
600 Diffusion models in forecasting: A comparison with the Box–Jenkins approach
G. Gottardi and E. Scarso
617 An empirical comparison of utility assessment programs
S.O. Kimbrough and M. Weber
634 An optimal state-age dependent replacement for a network system
W. Feng, K. Adachi and M. Kowada
647 The Constant Fallacy: A persistent logical flaw in applications of Lanchester's equations
R.L. Helmbold

659 Contents Volume 75
